

We Specialize in Organic Chemicals

Founded in 1977, Nation Ford Chemical is one of America's most respected custom manufacturers of specialty organic chemicals. The company specializes in the production of a variety of organic intermediates, polymers and colorants for a broad range of customers worldwide.

The team members at Nation Ford Chemical take pride in delivering high quality at a reasonable cost. For over 35 years, NFC has been known for its ability to outpace other companies by reducing the lead time necessary to bring new chemicals into production. Our customer-centered approach to toll manufacturing means we deliver the product you need when you need it.

Chemical production is based at our 28-acre site in Fort Mill, South Carolina, USA, and products are sold worldwide. While sulfanilic products are sold primarily from the USA, NFC has partnered with our China office to efficiently source low-cost raw materials from the Far East.
